

## Reliable, Affordable Virtual Hosting for Small to Medium Businesses

Metrofile Cloud's VPS Hosting is designed specifically for small and medium enterprises (SMEs) that require high-performance, cost-effective virtual server hosting. Built on KVM (Kernel-based Virtual Machine), our VPS offering provides a simple yet powerful hosting environment for low complexity deployments.

We understand that not all businesses require complex multi-server architectures – that's why we've crafted a streamlined solution that delivers reliable performance without the complexity (or cost) of an enterprise setup.

### Key Features and Benefits:

**Cost Effective:**

Affordable pricing without sacrificing performance.

**Fast Deployment:**

Get up and running in minutes with minimal setup.

**Flexible Configurations:**

Customize your virtual machine with the resources you need.

**Optional Management Packs:**

Add advanced backups, cybersecurity, patch management and more.

**Scalable:**

Start small and grow as your business expands.

**Self-service portal:**

A user-friendly portal enabling customers to make payments directly from the site, ensuring convenience, control and ease.

## VPS Hosting (SMB) vs VDC Hosting (Enterprise) – What’s the Difference?

Feature	VPS Hosting (KVM)	VDC Hosting (Enterprise) (VMware)
Target Market	Small to medium businesses	Large enterprises, multi-server, complex setups
Complexity	Simple, less complex deployments	Multi-server, advanced networking (e.g., VPN)
Virtualization Platform	KVM (Kernel-based Virtual Machine)	VMware
Backup	Basic backups included (option for advanced)	Full backup and disaster recovery
Deployments	Fast and efficient	Slower and complex
Cybersecurity	Optional with Management Pack	Integrated enterprise security suite
Patch Management	Optional with Management Pack	Included as part of enterprise support
Scalability	Scale single Virtual machines	Large, complex multi-server environments
Networking	Basic Public Networking	VPN, VLAN, complex multi-site networking
Cost	Low to moderate	Higher due to enterprise-grade features
Support	Unmanaged with optional support packs	Full 24/7 enterprise support

### Management Packs (Optional Add-ons)

-  **Advanced Backup:** Automated backups, restore points, and disaster recovery.
-  **Cybersecurity:** Endpoint protection, firewall, and malware scanning.
-  **Patch Management:** Automated OS and application updates for better security.
-  **Support:** 24/7 support.
