TAKE YOUR BUSINESS ON THE ROAD

# Make your business mobile, take your software to the cloud

Work from your phone or tablet, from anywhere, at anytime!

## Letsap Application

Letsap is a Sage Integrated Solution.

This solution integrates seamlessly with Sage 200 Evolution, Sage 50Cloud Pastel Partner, and Sage 50Cloud Pastel Xpress software. Make your business Mobile, take your software to the cloud, and have multiple desktop devices without adding extra users to your software.

### Why do you need it?

Take your business on the road, no need to wait to get back to the office to handle your admin. Give your sales team the power to process on-site. Letsap will help you create a clean, paperless admin system where everything is automatically saved to your Sage Pastel database at the office. With our Letsap mobile application, you can work from your phone or tablet, from anywhere, at anytime!

Letsap Runs on IOS and Android devices and the app is available on the Google Play Store and Apple Store.

Save money and  
**REDUCE ADD ON USER COSTS**  
 by adding the Letsap application to your software.

Letsap allows you to  
**SIGN OFF ORDERS**  
 before leaving your client's office!

With our Letsap mobile application, you can work from your phone or tablet, from anywhere, at anytime!

LETSAP MOBILE

# APPLICATION FEATURES

## Client Information

- View if a client is on hold.
- Allows Multiple Companies.
- All the features are easily accessible from one dashboard screen.
- If your business operates from different sets of accounts, depending on the service your customer requires, Letsap can connect you to all of these.
- You can see complete sales history of clients and even drill down to view transactions.
- You have access to complete client contact and location information.
- View client details such as map Location and phone number. You can even call directly from this screen!
- Filter clients according to sales codes. This prevents the sales consultants selecting customers not serviced by them.

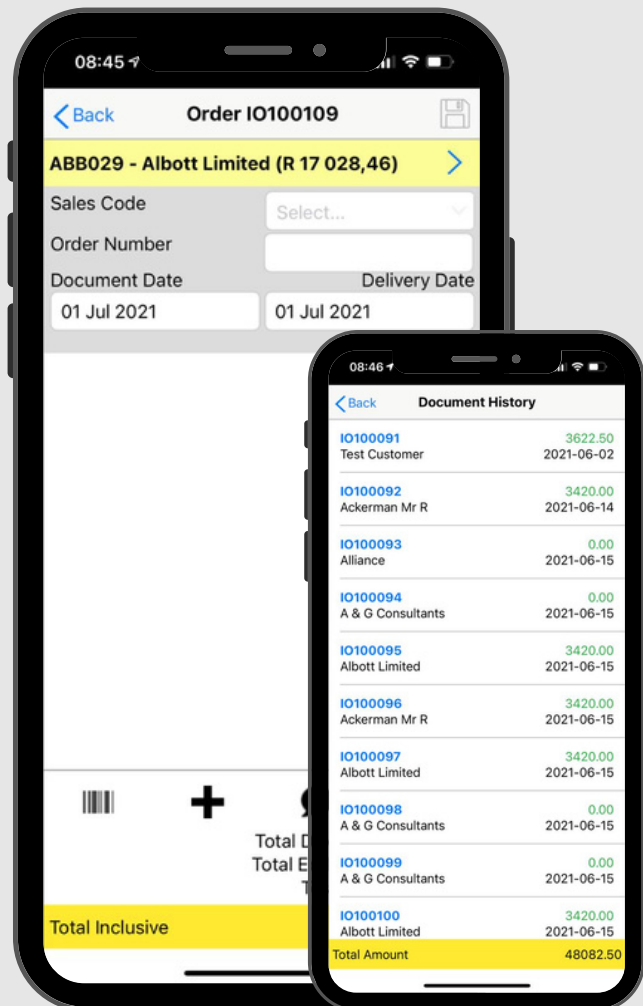

**Need your customers details while on the road?  
No problem, access your clients details anywhere.**

LETSAP MOBILE

# APPLICATION FEATURES

## Document Capturing

- It allows you to issue Invoices, Orders, and Quotations on the road.
- All transactions are processed in real-time, live updates to your Sage software.
- You can enter notes on the documents.
- Email and view all these documents from your phone.
- Authorise a transaction with the client's signature, which minimises paperwork, and saves time. Print your client's signature on the document.

## Stock Information

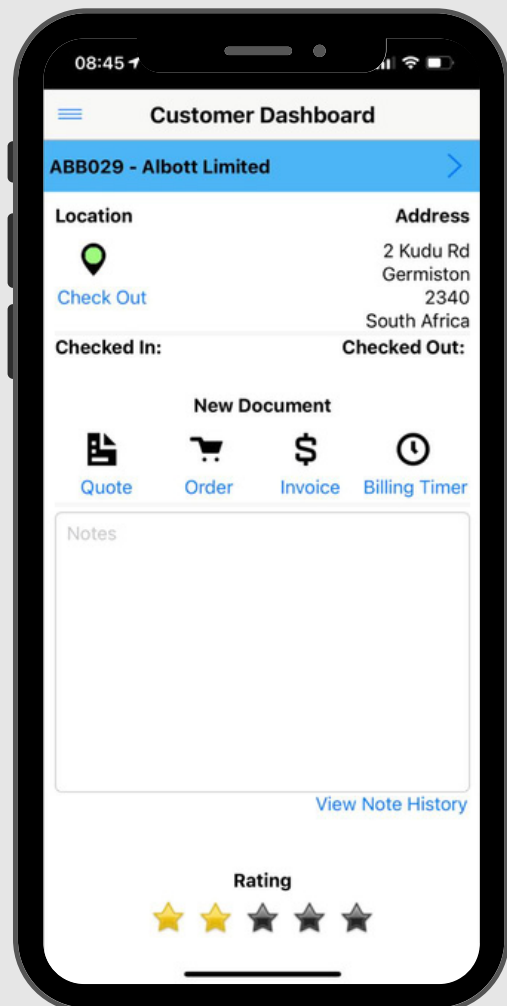

- View product images.
- Scan barcodes – quicker than searching manually.
- You can access real-time stock quantities at any of your stores. You can view actual quantities available at other warehouses and branches. It's useful if you don't have the stock available at your warehouse.

**Allows sales reps to issue Invoices, Orders and Quotations on the road.**

# APPLICATION FEATURES

## Billing Timer

- A timer option can automatically add consultation time spent with clients onto invoices.
- The check in and check out feature allows sales reps to log sales activity.
- Out on the road view, document history by salesman for a selected period.
- This application is extremely lightweight using minimal data. The app uses geolocation services, however, these have been optimised to reduce battery consumption.
- Offline feature available.
- Runs on IOS and Android devices.

## Management Portal Online

- Reporting
- GPS login allows sales managers to track locations of sales reps' activities.
- Weekly time and attendance per sales rep.
- Customer missed calls and planning per sales rep.

**Our check in and check out feature allows  
your sales reps to log sales activity.**
