Elevate Your Procurement with ProcureTech

Your Ultimate Solution for Hospitality Management

ProcureTech

Embark on a journey of streamlined procurement processes with ProcureTech, our advanced Departmental Purchasing Application. Initially crafted for leading hotel groups, we're thrilled to extend its transformative capabilities to game lodge hotel chains and other hospitality industry clients across South Africa and Africa.

Why do you need it?

- ✓ Ensures a seamless purchasing experience, saving time and enabling businesses to focus on core operations.
- ✓ Offers pre-filtered grids of the entire departmental stock listing, eliminating the need for manual PO creation and individual item searches.
- ✓ Provides a comprehensive list of departmental requirements, allowing easy access to all items needed for a purchase.
- ✓ Streamlines multi-level purchasing and authorization for industries with complex procurement needs.

Key Product Features:

-  **Centralized Purchasing**
Optimize procurement processes by centralizing purchasing for all departments, enhancing operational efficiency and cost-effectiveness.
-  **Easy Grid Format**
Navigate purchasing effortlessly with our organized grid format, categorized by locations, departments, or warehouses for seamless procurement management.
-  **Customizable Approval Flows**
Tailor approval workflows to match your organizational structure, ensuring efficient requisition approvals from departmental levels to centralized procurement teams.
-  **Non-Stock Expenses**
Efficiently manage requisitions and approvals for non-stock related expenses, operations, and capital expenses, ensuring financial transparency and accountability.
-  **Multi-List Compatibility**
Customize your purchasing experience with ProcureTech's multi-list compatibility, catering to the unique needs of each department within your organization. Whether it's your bar or rooms department, ProcureTech ensures tailored ordering processes for optimal efficiency.
-  **Stock Management**
Gain control over your inventory with comprehensive stock management features, including consumption tracking, inter-branch transfers, and stock take functionalities.
